

Vaccine Information Statements

Everyone who administers vaccines is required by law (the National Childhood Vaccine Injury Act of 1986) to give out current Vaccine Information Statements (VIS's) at the time of **each** vaccination.

You must give the patient **current** copies of the VIS before **each** vaccination, and the VIS must be in a form that the patient can take home with him/her.

VIS publications can be printed from the Document Center on the home page of the Louisiana Immunization Network for Kids Statewide (LINKS) registry at https://lalinks.org/linksweb/LINKS_VIS.html.

VIS's in many languages are available for printing from the Centers for Disease Control & Prevention (CDC) website at <https://www.cdc.gov/vaccines/hcp/vis/index.html> or from the Immunization Action Coalition website at <http://www.immunize.org/vis/>.
